Total Solar Reflectance (TSR) refers to the method of measuring a surface coating's reflective capability. The TSR test results presented apply only to the Roof Protect range and are derived from controlled laboratory conditions and are provided for comparative purposes only. Actual performance may vary based on environmental factors, application methods, and on-site conditions. Colours marked with ☼ can be ordered in HRC (Thermal Heat Reflective Coating). HRC coatings increase the TSR to make darker colours cooler than their standard equivalent. Colours marked with ▰ are the limited range for 20-year Warranties on Metal Roofs. Colours shown are as close as possible to actual colours and finishes can vary depending on the application. Due to limitations of your display screen and the printing process, photographic and printed images may not represent the true colour. Refer to actual samples for exact colour and finish. COLORBOND®, BlueScope and ® colour names are registered trade marks of BlueScope Steel Limited. TM colour names are trademarks of BlueScope Steel Limited.

Made for Australia

AUSTRALIAN MADE. AUSTRALIAN OWNED. AUSTRALIA WIDE.

From vivid coastlines to rural pastures, from harsh deserts to lush rainforests and right up to snow-capped ranges, Australia has it all, with each region distinctly recognised by its unique landscape and nature's own colour palette.

Our colour range is inspired by the land we live on – gentle pale tones, earthy mid tones and bold deep tones – a familiar palette that is forever timeless.

Behind the colour is proven endurance – a roof membrane designed for Australia's extremes: intense sun, salt-laden winds, sudden storms and cold winter nights, conditions your roof is exposed to every day. Through hot and cold, dry spells and downpours, the Roof Protect range is formulated to withstand the conditions of this rugged country.

Engineered for roof restorations Australia-wide – from coast to country – providing proven protection, backed by a warranty of up to 20 years*.

Industrial Roof Coatings – Made for Australia.

*The Roof Protect system offers 15-year or 20-year material warranties, with the Roof Refresh system offering a 10-year material warranty, dependent on the product used and subject to application by an approved roofing applicator in accordance with specification. The warranty specifically addresses product performance, film integrity and resistance to peeling and cracking. For full terms, eligibility and exclusions, visit www.industrialroofcoatings.com.au or call 1300 241 858.
